

Distinguished members of the scoreboard,

My name is David Pereira, I'm Portuguese living in Brussels and I'm 34 years old. I have a university degree in Management from the University of Evora in Portugal in 2011. Currently, I've been working for the past 10 years as an administrative assistant in an office in Brussels for Caixa Geral de Depositos, a Portuguese bank.

In my job, I have been keeping up with the evolution of the IT sector, and I have developed an interest in artificial intelligence

I learned about the Master's degree in Managing Digital Transformation in the Health Sector through a friend who completed his master's at ISCTE. I was immediately interested because this master's is linked with two areas in which I have a strong connection and interest. In addition to being an excellent opportunity to pursue a Master's degree taught by professors from three well-reputed institutions from different European countries, it will certainly enable enrichment at both intellectual and cultural levels.

I am very motivated to pursue the health AI area, being this a field of study in exponentially growing. Health IT is fundamental to improve healthcare systems.

This Master's program will enable me to development my knowledge and research capacities in the health AI field.

I'm a committed person who strives every day to successfully accomplish all the goals that are proposed to me and therefore I also intend, with this opportunity, to carry out a new formation in this field to deepen my knowledge in new technological areas.

I subscribe with the utmost consideration,

David Pereira
