

# Motivation letter

Dear Sir or Madam,

I am writing this motivation letter to apply for THE MASTERS PROGRAMME IN MANAGING DIGITAL TRANSFORMATION IN HEALTH CARE SECTOR 2024 autumn program. I graduated from Laurea University of applied sciences as a Registered Nurse in the year 2019 (<https://g.co/kgs/m1Ytp5Q>). Ever since I have been working as a Registered Nurse in HUS inpatient ward oncology department (<https://www.hus.fi/potilaalle/sairaalat-ja-toimipisteet/syopakeskus/syopatautien-osasto-s4a-meilahden-siltasairaala>). During these 5 years of working experience in my current ward I have realized that there has been lots of developments in the health care field like technological advancements, Digital therapeutics, Revolutionizing drug developments, medical robotics and many more. As Medical ecosystem itself is a very vast field, it is always nice to learn new things and keep up your skill set to help you let go forward with such booming advancements in this health care system.

My student years in Laurea University has undoubtedly helped me get prepared for the professional working life. Not only did I develop a proficient understanding of the nurse's role in the health care field, but I also got an amplified professional skill set in Oncology. Despite having challenges in understanding a foreign language and being able to communicate with my patients, I also have taken additional responsibilities over a period in CPR, Isotope care and Radiation, Training new employees and students etc. My intercultural perspective and language skills have been utilized while taking care of immigrant patients in the ward. I also have received the best employee of the year award after completing my first year in the ward. Initially even though the tasks seemed to be challenging at first, they did help me expand my knowledge base and furthered my interest in exploring for further studies to help increase my expertise and find new possibilities in the future.

When I first heard about the program that it is a combination of three areas to bring a multidisciplinary approach to provide new competences for the future health care and social care sector globally, It caught my attention and was genuinely intrigued by the versatility in the curriculum itself. Knowing that four different universities are clubbing up to bring their own specific strengths to the curriculum to make it a better joint education program, interests me. Being an immigrant myself, International learning environment has always been familiar, and I consider it as my strength for coping up in such challenging environment, and on top of that I published my graduation thesis on: Communication challenges faced by adult immigrant cancer patients in Western countries (<https://www.theseus.fi/handle/10024/171321>). Therefore, I am confident that I will be able to take up any further upcoming challenges during this study period at Laurea Master's degree program.

Thank you for reviewing my motivation letter and I hope that I am a suitable candidate for this program. Looking forward eagerly to hear from you for future interview.

Best Regards

Soumya Velpula
