Dear Members of the Admissions Committee,

I am writing to express my keen interest in the Master of Managing Digital Transformation in the Health Sector. With a foundational background in health service management from the National School of Public Administration and Local Government (ESDDA) and my role as a committed public servant, I am eager to deepen my understanding and expertise in digital transformation, an area I believe is pivotal to the future of healthcare management.

The Bachelor's degree in Political Science and the Master's in Social Policy have ingrained in me a profound understanding of the socio-political contexts that shape health services policies and their implementation. The curriculum of your master's program, particularly courses like MH03 Social and individual approach in health and MD10 Health data and information systems, directly aligns with my career objectives. The interdisciplinary approach combining management, technology, and healthcare systems offers the precise toolkit I need to contribute effectively to digital initiatives within public healthcare.

At ESDDA, where I am currently completing my degree in Health Service Management, I have engaged extensively with topics related to public health policy, technology in healthcare, and organizational behavior. My academic work, complemented by my practical experience in the public health sector, has equipped me with a solid grounding in the nuances of healthcare management. For my thesis in ESDDA, I focused on European and Greek legislation framework and policies on electronic health, which explored the integration of digital health records into existing public health infrastructure. This project not only honed my analytical skills but also my ability to translate theoretical knowledge into practical, scalable solutions.

Looking ahead, I am committed to playing a strategic role in transforming healthcare services through technology. The opportunity to learn from distinguished faculty and industry experts at ManagiDiTH will be instrumental in helping me achieve this goal. I am particularly excited about the prospect of collaborating with a diverse cohort, sharing insights and developing a global perspective on digital healthcare transformation.

In conclusion, I am enthusiastic about the prospect of joining ManagiDiTH and confident that my background, professional objectives, and academic interests are well-aligned with the goals of the Master of Managing Digital Transformation in the Health Sector. I am eager to contribute my experiences and ideas to your esteemed institution and look forward to the possibility of advancing my passion for digital healthcare innovation with your support.

Thank you for considering my application. I am looking forward to the opportunity to discuss my application in further detail.

Sincerely,

Filippos Christodoulou
