To whom it may concern

I want the opportunity to participate in the Master's Degree Managing Digital Transformation in the Health Sector because I want to change my career path and impact more people with my work.

My main goal as a healthcare professional is to promote access to healthcare, as well as to preserve the fair lifestyle of the professional.

Early on in my professional life as a speech and language therapist, I realized that this would only be possible if there was innovation, creative thinking and efficiency in the way health services are delivered. I believe that the digital transformation is part of this generation's future and that it will have a profound impact on healthcare. The course plan is exactly what I am looking for, as it will give me many different career options. The focus on entrepreneurship interests me, as I am a creative person who constantly tries to think outside of the box. I'm excited to start this new project and although I have a lot to learn in the digital area, I recognize in myself the value of clinical practice with patients who have shown me what perseverance and determination are, and how fundamental they are, in order to achieve true success.

Kind regards

Tatiana Freitas
