

14.05.2024

*Dear Team ManagidiTH,*

I am writing this letter to express my interest to be part of this new Master, which I came across on social media.

As a general care nurse, I moved to Germany almost two years ago and now I work in a specialized Intensive Care Unit with the name of “Weaning”, where I am part of a team who does the weaning of a mechanical ventilation.

I am confident that my skills, qualifications and what I have learned in this last two years would make a good candidate for this new project.

I work in a certified respiratory unit and the need of following up with the advance of technology is extremely important. In this last two years, I saw in multidisciplinary teams, the lack of knowledge about the development in technology in healthcare.

I believe I would gain knowledge and understanding in subjects, where the majority of the health workers don't have. On the other hand, I believe it would be possible to apply the knowledge in my day-to-day at work.

I am particularly interested in this Master because it's something that I always wanted to learn and didn't know that was possible: combining IT with healthcare, in a precious and fundamental form. I am excited about the opportunity to contribute with my skills and experience to a new project.

I would like to thank you for considering my application.

*Sincerely,*

Joana Margarida Louro Cabaço
