

## Work Certificate

Period 11.8.2016 – 15.1.2017

**Wael Awad**

Wael was working with Palringo Finland Oy already six months before the above official period through an educational program on project management. During that first six months, we already learned Wael to be a hardworking and motivated employee and wanted to hire him for full time QA.

Wael has been testing several game projects while working at our offices in Helsinki. All our games are not only mobile games, but they are games residing inside another application. (Games made for a chat application.) This requires for the QA person to also understand the interdependencies while handling and testing for the variety of handsets with differing iOS and Android versions and screen sizes. Wael has learned to use all the testing tools the company has been using (JIRA, Trello, HeidiSQL, Zypher, GoCD). Wael also has great language skills being fluent in three languages: Finnish, English and Arabic.

Wael has been a great team player and he has a very positive attitude towards work and life in general. I have no reservations to recommend Wael for the role of Game QA or similar positions.

14.12.2016
