ManagiDiTH

Digital Transformation of Healthcare starts with ManagiDiTH

Master' s Programme

To whom it concerns,

Dear madams/sirs,

I am writing this letter in order to inform you of my willing to apply for and attend the master's degree programme "**Managing Digital Transformation in the Health Sector (ManagiDiTH)**" which is offered by your institution.

I have been working as a civil servant in the health sector in Greece , which is the country I come from, since 2002. I have worked in different fields and sections, and they are all related with health fields and sections. When I started working, it was only a dream that we could use digital technologies in our working routine, but as the years passed technology entered our lives , and today it is an integral part of our jobs. As a way to improve and widen my knowledge about digital transformation especially in the Health Sector, undergoing this master's degree is necessary. I have always been interested in learning more and enhancing my knowledge, not only to boost my career growth but also to become a deeply educated person. This is the reason I am in favor of lifelong learning, and this is the reason I have never stopped trying to enrich my knowledge. The specific programme not only relates with my working duties, but it also fulfills my need and desire for acquiring knowledge.

As you will see after you examine my application, I think I comply with the needs of the programme , and I am a qualified candidate on it. I have enclosed the relevant documents for you to review and to look into, as it is requested.

Thank you for your kind consideration. I am hoping to receive a positive feedback from you.

Sincerely,

Zoi Gkouma
