

Motivation Letter

To:

Dear Members of the Admissions Committee of the ManagiDiTH Master's Programme,

**Members of the
Admissions Committee of
the ManagiDiTH Master's
Programme**

I am writing to express my strong interest in the Master's Degree in Managing Digital Transformation in the Health Sector (ManagiDiTH) offered by your esteemed institutions. As a dedicated medical student graduating this July from Medical School of Aristotle University of Thessaloniki, with a profound interest in the intersection of healthcare and digital technology, I am eager to advance my expertise and contribute to the evolution of healthcare services through this innovative programme.

From:

Throughout my medical studies, I have witnessed firsthand the critical need for effective digital solutions in healthcare. My experiences in various clinical settings have made it clear that digital transformation is not just a future aspiration but an immediate necessity for improving patient outcomes, enhancing operational efficiency, and ensuring equitable access to healthcare services. My motivation to apply for the ManagiDiTH programme stems from my desire to bridge the gap between medical practice and digital innovation.

Alexandros Liatsos

Details

The multidisciplinary nature of the ManagiDiTH programme, which integrates health sector skills, societal skills, and digital skills, aligns perfectly with my career goals. I am particularly excited about the opportunity to learn from leading experts across three renowned European institutions— University Institute of Lisbon, Aristotle University of Thessaloniki, and Laurea University of Applied Sciences. The programme's focus on real-world problem-solving, online learning flexibility, and multicultural environment will provide me with the diverse perspectives and practical knowledge necessary to drive digital transformation in healthcare.

Until now my educational journey has equipped me with a solid theoretical foundation in clinical practice, patient care, and healthcare management. However, I recognize that to effect meaningful change in the healthcare sector, it is vital that I acquire advanced skills in digital technologies, data science, and interoperability. The ManagiDiTH programme offers specialized courses in these areas, such as Health Data and Information Systems, Data Analytics and Machine Learning, and Technologies in Interoperable Ecosystems in Health, which I consider essential for my professional development, particularly when taking into consideration the vast changes taking place in the modern healthcare environment, leading to a new digital healthcare era.

Upon completing this programme, I aspire not only to keep up with the aforementioned changes but, just as importantly, to play a major role in designing and implementing digital health solutions that address current challenges in healthcare delivery, primarily in the field I am mostly interested in, namely neuroscience. Being at the forefront of clinical practice, my goal is to combine clinical work with digital health innovation, leveraging my medical background and newly acquired digital skills to improve healthcare accessibility, quality, and sustainability. I am particularly interested in projects that involve the integration of telemedicine, electronic health records, and AI-driven diagnostics to enhance patient care and streamline healthcare processes.

In conclusion, I am confident that the ManagiDiTH Master's programme will provide me with the knowledge, skills, and network needed to achieve my career objectives and make a significant impact in the healthcare sector. I am enthusiastic about the opportunity to contribute to and learn from the ManagiDiTH community and am committed to applying my skills and experiences to support the programme's mission.

I appreciate your consideration of my application and I look forward to the opportunity to further discuss my candidacy to the ManagiDiTH programme.

Sincerely,

Alexandros Liatsos
