Subject: Application for ManagiDiTH

Dear Ms. Ruusa Ligthart,

I am writing to express my interest in applying for the Master's Degree Managing Digital Transformation in the Health Sector (ManagiDiTH) online programme offered by three international higher education institutions.

I hold a Bsc in Nursing and I was an officer nurse of the Greek Navy where I worked for nearly twenty years. In 2020 I resigned and I moved with my family in Switzerland. I am married and I have three kids.

Although I was born in Greece and my native language is Greek, I also speak and write English at a very good level since I have worked a lot abroad where I used the language for professional and everyday life use. Since I live and work in Switzerland I also speak and write German at a high level.

Since I am not so young any more I have not yet a great idea about which are the already existing uses of digital technologies or the ones to come. But I am sure that they are going to be a part of our professional life and through their endless application possibilities they will transform the whole health sector. Of course these changes will also bring new challenges we have to face in order to ensure long-term success. Personally, I am also very interested to learn about Artificial Intelligence and the ethics of that.

There are a couple of reasons for choosing the Master from your University. First of all for the content of it, the fact that it is an international online programme delivered by three higher education institutions and of course because of the fact that it has no fee. The international character of your program would give me the privilege to interact, exchange opinions and create new relationships with people from different cultures.

I strongly believe that the program has everything I am looking for and an admission into this program would give me the perfect tools and knowledge that would be a step towards becoming a more educated professional having the knowledge about all the new aspects that the implementation of digital technologies in the health sector will bring. Therefore I would be really happy to have the chance of receiving the complete picture of all aspects of this field.

For all the above reasons I am looking forward to have the honour being accepted and joining this Master Degree Program.

I would like to thank you very much for taking the time to review my application and I will be patiently waiting for your reply. In case you have any questions about my application please contact me at angelgeo1551@gmail.com

Sincerely

Angelos Georgakis
