RE: EXPRESSION OF INTEREST MASTER'S IN MANAGING DIGITAL TRANSFORMATION IN THE HEALTH SECTOR

Dear Admissions Committee,

I am writing to express my interest in pursuing the Master's program in Managing Digital Transformation in the Health Sector offered at your institution. I have extensive experience in using information technology as a Technical Lead at Medecins Sans Frontieres to revolutionise healthcare in resource-constrained areas, such as in Africa. My desires to delve into healthcare systems, information technology and innovation within healthcare, push me to gain greater expertise and have a more meaningful impact in this field.

The program's structure and coverage of topics align with my professional and personal aspirations. Additionally, the diverse group of students is an opportunity for me to work on collaborative projects. I am looking forward to engaging with students who bring an international perspective to healthcare, and who are pushing themselves to be innovators in the field.

I come to this program with expertise and experience in managing healthcare delivery in challenging environments. I have seen the impact of information technology improve the care for marginalised populations, such as victims of violence, displaced communities and refugees.. Witnessing IT revolutionise care and improve patient outcomes in these settings has driven my passion to use information technology to improve healthcare in these critical contexts. I believe that my experiences put me in good stead to take advantage of the opportunities that such a program would offer.

I am eager to see how these skills, combined with the knowledge gained from your program, will position me as a leader in health informatics innovation on the continent.

Thank you for your consideration.

Sincerely,

Titus Kipruto
