- Management of shift team
- Clinical trial drug administration

## PUBLICATIONS

2023

### **Human Responses in Adolescents with an Oncologic Disease: a Scoping Review Protocol**

The classification of human responses to health conditions or life processes, assuming that human responses are the way that a person responds, referring to the individual's experiences, feelings, perceptions, behaviours and physical reactions, can be an exercise that, although challenging, is central to nursing diagnoses and, consequently, to nursing practice. It is necessary to gather and organise the existing knowledge about the human responses in adolescents with cancer, starting from the moment of diagnosis, due to the specificities inherent to this stage of human development.

Gonçalo Miguel Guerreiro, Sérgio Deodato, Daniela Graça, Catarina Fernandes. BMJOpen.
