DIPLOMA SUPPLEMENT

This Diploma Supplement model was developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications. It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original accompanying qualification and it is free from any value judgments, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.

4. INFORMATION OF THE CONTENT AND RESULTS GAINED

4.1 Mode of study:

Full-time (3 semesters) or part-time (6 semesters) study.

4.2 Programme requirements:

Minimum requirements:

For getting the M.Sc. a full or part time student is required to:

- successfully complete taught courses and collect 60 ECTS credits,
- submit a diploma thesis, which will be under the supervision of the designated faculty member (20 ECTS credits), and
- successfully attend a seminar in the methodology of research, technologies and applications of Informatics and Telematics (10 ECTS credits).

Each student must enrol and attend all courses in the direction chosen. Attendance at lectures and labs is mandatory. The evaluation in courses is in the 10 grade scale. Successful evaluation of a course requires a minimum grade of 6 (six).

Learning Outcomes:

The objective of the MSc is to educate and train students to special topics and applications of Informatics and Telematics, especially in the fields of network information systems, web technologies and online services and the efficient design and implementation of information systems for the benefit of organizations. For this purpose, emphasis is given to the areas of telematics, which are related to the web and internet technologies and have different applications, such as education, economy and transport.
