Dear Members of the Admissions Committee,

I am writing to express my enthusiastic application for the ManagiDiTH Master's programme.

With a solid background in Nursing and Health Informatics and professional experience in both healthcare institutions and healthtech companies, I am eager to enhance my knowledge and skills through your esteemed program.

The reason for choosing this programme lies in its exceptional multicultural european setting, with the excellent reputation of all universities involved, and your innovative approach to the digital transformation in healthcare.

I believe that graduating with Managing Digital Transformation in the Health Sector degree aligns perfectly with my career goals, to work with leading health technology companies and organizations where I can apply my skills to innovate and improve healthcare delivery systems. I am particularly interested in developing tools and platforms that enhance interoperability in electronic health records, like HL7, FHIR standards and openEHR; patient-centric initiatives that apply the ICHOM PROMS and PREMS; and applications of artificial intelligence in healthcare.

During my studies, I also dedicated my time to voluntary research in a ITEA labelled project (Inno4Health), which ignited my passion for digital transformation. Furthermore, my role in VirtualCare allows me to explore the implementation of software in healthcare institutions very closely, to pursue national and european partnerships in funding, but also in developing co-created products.

I am particularly interested in the management aspect of the programme, as I feel that's an aspect of my skillset that needs some working if I want to achieve my long term goals of transitioning into entrepreneurship. I'm confident that obtaining this Joint diploma by three EU universities will be a decisive step towards this ambition.

Thank you for considering my application. I am excited about the possibility of joining such distinguished institutions. Please do not hesitate to contact me if you require any further information.

Yours sincerely,

Daniel Rodrigues
