

MEDICAL VOLUNTEERS
INTERNATIONAL

Medical Volunteers International e.V. - Klempen 8-22297 Hamburg

Hamburg, 14th May 2021

To whom it may concern:

Alice Neves, born 26.02.1997, has been supporting Medical Volunteers International e.V. in Athens from September 2020 to April 2021 as medical coordinator.

Medical Volunteers International e.V. (MVI) is a German non-governmental organisation that by providing medical staff, has as its goal to bring medical care to those that need it the most. At the moment Medical Volunteers International e.V. operates in three locations in Greece (Thessaloniki, Athen and Lesvos) and also in Bosnia. MVI takes care of the homeless and refugees in camps, houses, parks or building ruins. Ms. Neves worked as medical coordinator for our organization in Athens.

She was responsible for the organization and guidance of our volunteers, organizing medical equipment and medicine, providing medical guidelines to international volunteers as well as being the contact person for any kind of medical questions. Daily work in Athens included wound treatment, acute illnesses, emergency management, employment planning and material management. Thanks to her personal engagement and very accurate way of working she was running the project in a very structured way and constantly improved its procedures..

Ms. Neves has proven herself as a highly responsible, well-organized and empathic colleague whose professional knowledge and social competence supported and boosted our project in various ways. She was very committed during her entire stay and she has proven herself as a competent and very stable employee. She was able to quickly and pleasantly manage our team and understood quickly how to carry out her tasks in the most effective way, communicate these with her co-workers and deliver the best results. Summarized, we have got to know Ms. Neves as solution oriented and very knowledgeable person in her field of work.

Without any hesitation, we would be happy to welcome Ms. Neves any time again in our team. At the same time, we are pleased to recommend her to other aid projects and healthcare programs wishing her nothing but the best for her future.

Yours sincerely,

Medical Volunteers International e.V.
