July 19, 2024

Dear Committee,

I've spent about 15 years of my professional life building a Hospitalization-At-Home software platform from scratch which is now deployed in several hospitals all over France. This exhaustive experience has helped me go through the complexities involved in using technology in healthcare domain, and now I am seeking to expand my knowledge.

ManagiDiTH project came to my notice on 17<sup>th</sup> July 2024 while I was browsing on my mobile phone desperately searching for a program that would reinforce my competencies related to the domain, while also letting me continue working.

Digital transformation of Healthcare is a sensitive subject mainly because at the core of it lies patient's private data. However what most actors ignore is that one of the biggest challenges, apart from the data security and administrative roadblocks, is **interoperability**. I've faced it professionally, hence I know it. Your curriculum offers a possibility to dive into it. That is one of my primary motivations behind applying for this program.

Another personal motivation of mine to be part of your program is to network with people, students as well as teachers, who share the same vocational interests as me. It may generate an exchange of ideas that could lead us into a territory that's not yet explored in terms of digital transformation in European Healthcare.

I am at a stage in my life where I can allow myself a dream, and create an ambition out of it. My dream is to build a modular digital platform that every European hospital can use to create a digitally enabled Home Healthcare department. The European demography needs it, it's a tough dream, but achievable given the right combination of skill sets and people.

There's a lot to do in this domain, and I seek to be part of it, and the first step according to me is to get into ManagiDiTH.

Please go through my whole profile, please evaluate both my failures and successes, and accept my application if you feel that I fit the criteria to be part of this program.

Thank you for your time.

Sincerely yours,

Mrugesh Chauhan
