Re: Susana Lourenço Lopes.

Dear whom it may concern,

Susana is at present a CT band 6 radiographer based at QMC. She has been employed at NUH since February 2019 firstly as a radiographer and from May 2021 in her current post.

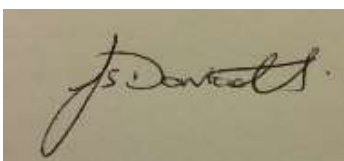

In her role she is responsible for acquiring good quality diagnostic images for patients attending for CT examinations. She rotates between several scanners and has performed a variety of scans from many patient sources including the Emergency department, Major trauma, Out patients and Inpatients.

She ensures the privacy, safety and confidentiality of the patients as per Trust policy; is required to maintain a clean and hazard free environment, adhering to infection control measures and report any incidents or concerns.

She is a good communicator and team player and always provides excellent patient care.

She works a variety of shift patterns and is flexible to the requirements of the service.

Yours faithfully,

Jackie Dorricott (CT Modality Manager)
