

I am a Registered nurse since 2012 and have completed a Master of Health Care degree at Turku University of Applied Sciences, graduating in 2021. After my graduation, I have worked as an Assistant Head Nurse, performing Clinical Nurse Educator since November 2021. Prior to that, I worked many years as a nurse in trauma care.

I am highly passionate about developing myself in the challenges of social and health care. In the future, I also want to address the challenges ahead by expanding my understanding of both technology and service design. I believe that we could increasingly use new technology and digitalization to address the challenges in healthcare and allocate existing resources in such a way that nursing experts receive maximum support from available support measures. Digital Health technology is a rapidly growing field, and with the support of my studies, I want to stay involved in this growth as an implementer of new information and communication technology procedures and services. I feel that this master's degree provides me with the necessary theoretical knowledge and complements my previous Master's degree. I have a long background in the healthcare sector, and I believe that both my theoretical and practical experience give me a good foundation and vantage point for completing my studies. I am a motivated student and completed my previous degree on schedule while working.

In my work, I am responsible for implementing new evidence-based nursing practices and ensuring competence. I work in a multidisciplinary manner. I have been a lecturer at several conferences organized by both the public healthcare sector and the private sector. I have also conducted training at various educational events. I have strong public speaking skills and am articulate; I do not shy away from challenges.

My positions of trust have included board duties: from 2015 to 2021, I served as a board member of the Finnish Trauma Nurses Association, and from 2021 to 2023, as a board member of the Uusimaa Nurses Association. I am currently serving as a board member of the Finnish Nurses Association on a four-year term, which will end at the end of 2025.

I hope to be selected for the program I am applying for, as I see learning as a continuum, and it best meets my needs when it supports and develops my expertise and enables me to manage larger entities.
