20th March 2015

To whom it may concern,

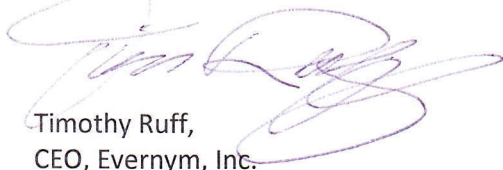

This is to certify that Mr. Syed Abrar Ahmed was employed as a 'Front End Software Developer' on Full time basis at Evernym from 10th January 2014 until 13th March 2015.

His employment came into effect when we contracted OuzelSystems, the company he was working for, as our primary product development team. This letter is a testament to his perseverance and commendable work ethics when he was working for us on behalf of OuzelSystems.

His responsibilities and activities included:

- Conforming and adhering to the principles of Agile Software Development
- Making proficient and timely use of the employed project management tools
- Developing, maintaining and updating web and mobile architecture using AngularJS
- Understand and implement project specifications on the front end
- Understand customer expectations and make necessary changes the development workflow to fulfill them
- Optimize the existing web solution to work flawlessly on multiple mobile devices
- Automate development, testing and deployment using Jasmine and GruntJS
- Build robust and scalable UI using HTML5, Sass and Javascript
- Implement native mobile capabilities using Cordova and its plugins
- Incorporate innovative ways to make the hybrid web app behave exactly like the native mobile app and as per customer's requirements
- Collaborate and work closely with the back end (server) team for clarifying project needs and to deliver the best solution possible
- Pay close attention to Mobile App Lifecycle

Sincerely,

Timothy Ruff,  
CEO, Evernym, Inc.
