### ABOUT ME

I am a student at the new Iscte campus in Sintra, in an area I have always wanted to pursue, for which there was no course that combined two of my major interests, which are technology and healthcare.

I would like to learn more about software, hardware, and artificial intelligence systems that could be developed in the healthcare field, especially to aid in surgeries, exams, and diagnostics.

I believe I have a good problem-solving ability and skills in organization and work planning.
