

To the Evaluation Committee of the Master's Program "Managing Digital Transformation in the Health Sector" (ManagiDiTH),

It is with great enthusiasm that I submit my application for the Master's program "Managing Digital Transformation in the Health Sector". I believe that this program offers a unique opportunity to deepen my knowledge and contribute to the digital transformation of the healthcare sector, a crucial area for the future of society.

My motivation to pursue this Master's arises from the intersection of my interest in technology and my passion for areas that directly impact human well-being, such as nursing, my undergraduate field of study. During my academic journey in the Postgraduate program in "Healthcare Services Management" I had the opportunity to explore topics such as "Information Systems" and "Data Analytics" which allowed me to understand the potential of technology to revolutionize healthcare. These topics sparked my awareness that the effective management of digital transformation in healthcare requires not only technical skills but also a strategic and multidisciplinary vision.

The areas covered in your Master's program align with my professional goals, which include leading innovative initiatives that combine technology, management, and social impact. I believe that digital transformation in healthcare should be guided by ethical principles and a deep understanding of the needs of both patients and healthcare professionals. Therefore, I am particularly interested in exploring how technology can be used responsibly and inclusively, ensuring that the benefits of digitalization are accessible to everyone.

I aspire to develop skills that will enable me not only to implement technological solutions but also to manage multidisciplinary teams, foster innovation, and ensure future sustainability. I believe your program offers the ideal environment to achieve these goals, thanks to its practical approach, the opportunity to collaborate with professionals from various fields, and the chance to meet colleagues from across the European Union and work on international projects. I look forward to actively contributing to the academic community of the program by sharing my experiences and insights.

To sum up, I see this Master's as a decisive step in my journey to become a leader in the digital transformation of healthcare, capable of addressing the complex challenges of this sector and creating solutions that aim to improve people's quality of life.

I appreciate your consideration of my application and am available to provide any additional information you may require.

Best regards,

Pedro Santos
