ManagiDiTH

Avenida das Forças Armadas, 1649-026 Lisbon

To the Selection Committee,

I am writing with great enthusiasm to apply for the Master's program in ManagiDiTH at ISCTE. Throughout my academic journey, I have developed a profound passion for technology, particularly in the fields of Artificial Intelligence and its applications in healthcare, which motivates me to seek both theoretical and practical advancements in this area.

During my undergraduate studies in Digital Technologies and Health at ISCTE, I had the opportunity to participate in various projects, including a collaborative initiative with Hospital Amadora-Sintra and other research endeavors focused on developing innovative health technologies. One of the most remarkable experiences was during the joint project with Amadora-Sintra, where I gained insights into data management and organization, learning the critical importance of data protection in healthcare settings.

ISCTE's program attracts me not only for the excellence of its faculty but also for its emphasis on technology and its application in healthcare. I am particularly interested in the areas of Deep Learning and Computer Vision in Health. I believe my analytical skills, dedication to research, and passion for innovation will significantly contribute to the academic community of the program.

I hope that this Master's program will equip me to take on more strategic roles in line with my professional and academic goals. Additionally, I aim to contribute to advancing knowledge in the field through impactful research and innovative solutions.

Thank you in advance for considering my application. I am entirely at your disposal for a potential interview.

Yours sincerely,

João Victor Moreira Bertulani
