**The program**

*Managing Digital Transformation in the Health Sector (ManagiDiTH)*

Dear members of the Admissions Committee,

Undersigned, *DOSPINESCU Laura-Cătălina*, I would like to express my enthusiasm for the international master program ManagiDiTH (Managing Digital transformation in the Health sector) offered by 3 major university centers, namely [ISCTE – University Institute of Lisbon, Portugal,](#) [Aristotle University of Thessaloniki, Greece \(AUTH\)](#) and [Laurea University of applied Sciences, Finland \(LAUREA\).](#) With a passion for using technology to improve health systems, I believe this program is the next essential step in my professional career.

Currently, I work in the university environment and I am a PhD student in Electrical Engineering at the “Ștefan cel Mare” University of Suceava, where I had the opportunity to observe how digitalization can fundamentally transform the way services are delivered. My PhD topic (Analysis of Biomedical systems of people at work) is related to the topic of this Master’s degree. My experience has taught me that integrating digital technologies not only improves the efficiency of operations, but also provides significant opportunities for improving the patient experience. The main reason I want to follow this program is the desire to acquire specific knowledge and skills to engage in such digital transformation initiatives.

My professional objective is to get actively involved in projects that harness the technological potential to meet current challenges. I believe that the studies under ManagiDiTH will provide me not only with the necessary skills in change management and data analysis, but also with a deep understanding of the strategic issues related to the implementation of digitalization in health systems. I believe that a holistic approach is essential to lead teams to success in these initiatives.

I am very interested in learning from renowned teachers and working with colleagues who share the same passion for digital transformation in health. I am convinced that interacting with different perspectives will enrich my educational experience and contribute to my professional development.

In conclusion, I am highly motivated to join the ManagiDiTH program and I strongly believe that it perfectly aligns with my career aspirations. Thank you for your attention.

With consideration,

*DOSPINESCU Laura-Cătălina*
