

Motivation Letter

To whom it may concern
To ingress in the Master's Program
Digital Transformation of Healthcare

Name: Rita Alexandra Barbosa da Silva Ferreira

I' am a Speech and language therapist and I choose this master's program because I want to do a change life career and I want to develop my skills in a cteam area.

I am writing to apply for an opportunity to make part of the master's degree program in Digital transformation in health.

I met this concourse, with online research and I took the liberty to write this letter with the purpose of joining this master's program- Digital Transformation in Healthcare, throw the process you have prepared to students from all countries of European group.

With a little research I got interested in the area of information systems correlated with health.

This candidacy is a very considered and reflected choice.

I understand the importance of digital transformation in health. The digital transformation is directly connected to the way people can correlate themselves with the processes. In this case, technology is a way to make this happened. I think it will be a great opportunity to help organizations to have a better efficiency.

I would like to have an opportunity to work and learn more with you and to make part of all of this process.

With all of my attencion.

Best regards.
