

WORK CERTIFICATE

Rita Ferreira is a collaborator in our Center.

She is a Speech and Language Therapist - SLP with a large period of experience with the follow work duties:

- Provided training and technical assistance to children and parents of children ages 1–18 yrs. to facilitate language growth.
- Participated in all aspects of the research process literature review, data collection, language sample transcription, data analysis, research paper, and poster presentation.

I have the pleasure of following her work with kids from 3 to 18 years old.

I think this master's programme – Digital health transformation would be a great opportunity for Rita to improve her capacities in another way.

I highly recommend Rita because she is a proactive person which gives value to any team.

Best regards.
