

Motivation Letter

20/02/2025

Dear Sir/Madam,

My name is Evangelia Chatzimichali and I would like to apply for a Master in Managing Digital Transformation in Health Sector implemented by AUTH and collaborating European universities starting in September of 2025. I am a highly motivated young professional who perceives this degree to be beneficial for my future career in medicine. My strong clinical and academic background in thoracic surgery makes me a strong candidate for this competitive program.

I hold a Bachelor's Degree in Medicine from Aristotle University of Thessaloniki. Since then, I have clearly determined my career goals and would like to continue my education at your esteemed university.

I would like to learn more about data science and digitalisation of everyday clinical practice and after looking over your curricula, I believe that the university offers the best opportunities for me to educate myself further in this field.

I believe that my education and career offer a solid foundation. However, through the university's master program, I hope to develop and learn more about the field of Information and Communication Technologies.

Attached to this application are the documentary requirements necessary for my admission. Thank you very much for your consideration.

Sincerely,

Evangelia Chatzimichali
