

## Motivation Letter

Dear Admissions Committee,

As a graduate Nurse with experience in the healthcare sector, I have developed a keen interest in the digital transformation of health and the revolutionary possibilities it offers for improving service quality, patient safety, and the effectiveness of healthcare systems. My interest in this specific master's program, stems from my desire to gain skills in the strategic management of digital transition, so that I can contribute to enhancing the quality of health services through innovative technological solutions. Working in nursing with a focus on technological applications has shown me the importance of digital transformational leadership, and I wish to move from a purely clinical position to a more managerial and design-oriented one, where I can combine my clinical experience with digital-reform skills. I believe Greece needs professionals who understand both clinical and technological requirements for a sustainable digital transition, an area where it lags behind other European countries. My goals are to become a specialist in designing and implementing digital strategies for hospitals or public health bodies, to bridge clinical reality with technological innovations and improve efficiency and patient safety, and to participate in research projects that advance the use of artificial intelligence and robotics in nursing. I have chosen this master's program because it blends management knowledge with specialized technological applications in healthcare, aligning perfectly with my objectives, and offers the opportunity to study real case studies and interact with industry experts. Expertise in areas such as cybersecurity, e-health policies, and data management will help me become a more well-rounded professional. I wish to invest in education that aligns with the future demands of the health sector, and with my clinical background and new knowledge, I aim to become part of the solution for more personalized, efficient, and sustainable healthcare delivery. Thank you for considering my application.

Sincerely,

Christos Tsakonas RN Nurse
