Subject: Motivation Letter

Dear Admissions Committee,

My name is **Sampreeti Atta**, and I am writing to express my strong interest in joining the **Managing Digital Transformation in the Health Sector (ManagiDiTH)** Master's programme.

I hold a **B.Sc. (Honors) degree in Computer Science** from the **University of Calcutta, India**. My undergraduate studies provided me with a strong foundation in programming languages, data analysis, machine learning fundamentals, database management, and information systems. Throughout my academic journey, I developed a growing interest in how emerging technologies can drive innovation and improve critical sectors like healthcare.

Following the completion of my Bachelor's degree in 2019, I accompanied my husband across different European countries due to his academic research engagements. The global COVID-19 pandemic further limited my opportunities to pursue a Master's degree during this time. However, my passion for learning and ambition to contribute to digital transformation remained steadfast.

Recently, during my husband's research visit to **ISCTE - University Institute of Lisbon, Portugal**, I had the opportunity to meet **Professor Vítor Basto-Fernandes**, who introduced me to the **ManagiDiTH programme**. Upon exploring the curriculum and objectives, I immediately realized that this Master's programme aligns perfectly with my academic background and professional aspirations. Its multidisciplinary approach — combining health sector skills, societal impact, and digital innovation — is exactly what I seek to further my career.

To strengthen my academic readiness, I have recently enrolled in **Open Programming and Database Courses** at the **University of Turku and Turku University of Applied Sciences**, Finland. These courses, which include fundamentals of programming, relational databases, and object-oriented programming, are enhancing my technical skills and preparing me to meet the demands of advanced studies in digital healthcare transformation.

I am particularly excited about the opportunity to specialize in **Data Science**, as it complements my skills in programming and data analysis; however, I am also open to pursuing the **Interoperability** specialization if needed, as my background in Computer Science provides a strong foundation for both fields.

Currently, I am residing permanently with my husband in **Jyväskylä, Finland**, holding a **Type A Finnish Residence Permit**. This stable living situation supports my plan to fully dedicate myself to the rigorous academic demands of the ManagiDiTH programme.

Upon completing the Master's degree, I aspire to work on projects that design, implement, and manage digital health services, contributing to building more efficient, accessible, and patient-centered healthcare systems. I am also highly interested in pursuing higher studies related to research in the field of digital healthcare transformation. I am highly motivated to become part of a global network of experts who drive digital innovation in healthcare across Europe and beyond.

Thank you for considering my application. I am enthusiastic about the opportunity to join the multicultural and interdisciplinary ManagiDiTH community and to contribute to its vision through dedication, collaboration, and innovation.

Yours sincerely

A handwritten signature in black ink that reads "Sampreeti Atta". The script is cursive and fluid, with the first name "Sampreeti" being larger and more prominent than the last name "Atta".
