Dear all,

I am writing to show my intense interest in pursuing the Master's Degree in Managing Digital Transformation in the Health Sector at ManagiDITH. With 18 years of experience in nursing and a dedicated approach towards quality care and innovation, I am highly interested in building on my capabilities in digital health technologies and driving impactful changes in delivering care. Throughout my career, I have had extensive experience with Electronic Patient Records (EPR), and I was able to play an active role as a link nurse when implementing the system in my current workplace. Through that experience, I became more familiar with practical, clinical, and technical aspects of integrating digital health and reaffirmed my conviction that digital platforms—particularly when combined with tools in ascendancy today like artificial intelligence are a necessary part of contemporary health care system. I believe strongly that technology and healthcare are intricately intertwined. Digital transformation not only increases efficiency but is also a key route for enhanced patient safety, reduction of human error rates, and assisting in data-led decisions. The driving inspiration for applying for this master's program is the need for developing those strategic, managerial, and analytical capabilities required to organise change and innovation in medical environments.

Alongside my clinical experience, I have also undertaken postgraduate studies in wound care and tissue viability that reaffirmed my interest in evidence-based practice and ongoing education. I believe that this program's multidisciplinary framework and focus on practical application will enable me to connect my frontline experience with leadership for eHealth transformation. Thank you for considering my application. I am eager for the opportunity to make a difference in and grow through the program at ManagIDITH and use what I learn to enhance healthcare systems and results.

Yours sincerely,  
**Hélder Cardoso**
