Application for the Master's Programme in Managing the Digital Transformation in the Health Sector (ManagiDiTH)

Dear Committee,

I am writing to express my strong interest in the ManagiDiTH Master's programme. As a nurse with a specialization in public health, a Master's degree in Diabetes Mellitus, and extensive experience in emergency care, I have developed a deep understanding of patient needs, health system challenges, and the critical role of innovation in improving care delivery.

Throughout my career, I have seen how outdated systems and limited digital integration can hinder both patient outcomes and operational efficiency. This has driven my ambition to help lead the digital transformation of healthcare—making it more data-driven, accessible, and responsive. I believe the interdisciplinary structure of ManagiDiTH, especially its focus on health data, digital systems, e-health, and ethics, aligns perfectly with my goal of bridging clinical practice and digital innovation.

I am especially interested in learning how to design and manage digital services that support chronic disease care and emergency response, drawing from my background in diabetes management and acute care. Additionally, I am eager to gain a stronger foundation in areas such as health data classification, telemedicine, and privacy in digital health.

I am confident that ManagiDiTH will equip me with the skills needed to contribute meaningfully to the future of healthcare, and I look forward to learning from a diverse and forward-thinking community.

Thank you for considering my application.

Sincerely,

Stavroula Fasnaki
