**Diploma Supplement**

First Cycle Programme  
Diploma Supplement Number: 22

*This Diploma Supplement model was developed by the European Commission, Council of Europe and UNESCO/CEPES. The purpose of the supplement is to provide sufficient independent data to improve the international 'transparency' and fair academic and professional recognition of qualifications (diplomas, degrees, certificates etc). It is designed to provide a description of the nature, level, context, content and status of the studies that were pursued and successfully completed by the individual named on the original qualification to which this supplement is appended. It should be free from any value judgments, equivalence statements or suggestions about recognition. Information in all eight sections should be provided. Where information is not provided, an explanation should give the reason why.*

8. INFORMATION ON THE NATIONAL HIGHER EDUCATION SYSTEM

Students who successfully complete their studies at Universities are awarded a Ptychio or Diploma. First cycle programmes last from four years for most fields to five years for engineering and certain other fields of science and six years for medicine. The Ptychio or Diploma provides the opportunity for further study at the post-graduate level leading to the second degree, Diploma Metaptychiakon Spoudon- equivalent to the Master's degree - and the third cycle of studies leading to the doctorate degree, Didaktoriko Diploma - equivalent to the PhD degree.

Law 4653/2020 defines the framework, the procedures and the criteria of the evaluation and the certification of quality assurance in Higher Education. Law 3374/2005 deals with the European Credit Transfer and Accumulation System, as well as the Diploma Supplement.

These measures aim at promoting student mobility and contributing to the creation of a European Higher Education Area, as this is defined by the Bologna Process.
