

Dear Members of the Admissions Committee,

I am writing to express my strong interest in the ManagiDiTH (Managing Digital Transformation in the Health Sector) master's program. As a registered nurse with a passion for healthcare and its continuous evolution, i am eager to develop my skills in digital transformation within healthcare systems. Having completed a postgraduate degree in 2024 on Healthcare Management, i see this program as a valuable opportunity to expand my knowledge and contribute to the modernization of healthcare delivery.

Throughout my nursing career, I've seen how essential digital tools are in improving patient care, streamlining workflows, and increasing efficiency in healthcare systems. My postgraduate studies introduced me to topics such as cybersecurity in healthcare, program development like Scinico, SAM, SAPE and the importance of interoperability. These experiences sparked a strong interest in the intersection of technology and healthcare, particularly in how digital infrastructure can enhance communication and patient-centered care.

The ManagiDiTH program's focus aligns with my career goals. I'm especially interested in exploring healthcare data management, the application of AI and machine learning in health. I believe this knowledge is key to driving innovation in healthcare and ensuring systems are prepared for ongoing digital challenges. In the long term, I aim to take on roles that promote the integration of digital solutions in healthcare practice. I am confident that the program will provide me with the expertise needed to support meaningful improvements in healthcare organizations.

I am excited about the possibility of joining the ManagiDiTH program, and I am confident it will provide the ideal environment for both professional and personal growth. Thank you for considering my application.

Sincerely,
Rita Barbosa
