Dear Madam/Sir,

I am writing to express my strong interest in the Master's Degree "Managing Digital Transformation in the Health Sector (ManagiDiTH)". With over 9 years of experience in digital transformation within the public sector and currently serving as State Secretary for Digitalization in Health in the Republic of Moldova, I am deeply motivated to further strengthen my academic foundation and practical expertise through this interdisciplinary and highly relevant programme.

In my current role, I lead the implementation of Moldova's National eHealth Strategy 2030 and coordinate the digital transformation of our national health system, including the development of an integrated Electronic Health Record, data governance structures, and alignment with the European Health Data Space (EHDS). I represent the Ministry of Health in strategic dialogues with WHO, the European Commission, and other development partners, and I have led Moldova's delegation during the Chapter 28 EU bilateral screening on consumer and health protection.

Prior to this, I served as Project Officer for Digital Education and Innovation at UNICEF Moldova, where I managed digital learning initiatives, introduced assistive technologies in schools, and developed national ICT standards. These experiences reflect my cross-sectoral understanding of digital transformation in both health and education, and my commitment to equitable, sustainable innovation in public services.

The ManagiDiTH programme's focus on data science, interoperability, ethics, and innovation directly aligns with the strategic needs I currently oversee and the professional challenges I encounter daily. I am particularly drawn to the programme's international structure, flexible format, and practical approach to solving real-world problems. I am confident it will enrich my skills and support Moldova's efforts to build an inclusive, secure, and interoperable digital health ecosystem.

I would be honoured to join the ManagiDiTH community and contribute actively to its multicultural and collaborative learning environment. I am eager to exchange knowledge, gain insight from expert faculty, and apply new perspectives to support the digital health transformation of my country and the region.

Thank you for considering my application.

Sincerely,

Corneliu Ciorici
