

12/05/2025

Dear Admissions Committee,

I am writing to express my strong interest in the Master's program in Digital Health Education (DigiHealthEdu). Currently, I'm a university-trained Registered Nurse specialising in Intensive and Emergency Nursing. At the same time with my clinical practice, I am also enrolled in a Master's program in Health and Social Care Services Management at Aristotle University of Thessaloniki, at the Medicine School, the same institution offering the DigiHealthEdu program. Through this postgraduate education, I have gained valuable insights into healthcare policy, system organisation, and leadership, which I am eager to complement with specialised digital health competencies.

Additionally, I have completed a certified course in Telemedicine for Chronic Disease Management, developed in collaboration with other European universities, and an immersive week at the University of Piedmont Orientale in collaboration with the SIMNOVA simulation centre in Novara, Italy. This program sparked my deep interest in remote care technologies and their potential to enhance patient outcomes and healthcare accessibility. It also reinforced my motivation to contribute to the digital transformation of health services.

The DigiHealthEdu program represents a nice opportunity to build on my academic and professional background. I am particularly drawn to its interdisciplinary and practice-oriented approach, which aligns with my goal of becoming a competent health professional equipped to lead digital education initiatives in clinical settings.

I would be honoured to join this program and collaborate with a network of experts dedicated to advancing healthcare through digital education. Thank you for considering my application.

Sincerely,

RN nurse,

Daskalou Chrysa Paraskevi
