Dear Admissions Committee,

I am writing to express my sincere interest in the Master's Degree in Managing Digital Transformation in the Health Sector (ManagiDiTH). With a strong academic background in Accounting and Finance, as well as a postgraduate degree in Management and Organization of Health and Social Care Services, I am eager to contribute to the digital transformation of healthcare systems and improve their overall efficiency and sustainability.

My studies at the Department of Accounting and Finance provided me with solid foundations in financial analysis, budgeting, strategic planning, and decision-making. I developed the ability to interpret and manage complex data, assess financial performance, and understand the dynamics of both private and public organizations. Additionally, I gained experience in using business software and presenting financial and operational information clearly and effectively — essential skills in a data-driven healthcare environment.

My MSc in Management and Organization of Health and Social Care Services at Aristotle University of Thessaloniki allowed me to deepen my understanding of health systems and the challenges they face in terms of governance, resource management, and quality of care. During this program, I acquired valuable knowledge in health economics, organizational behavior, public policy, and health information systems. I also learned how to apply management principles to real-world health sector problems, even if I haven't yet graduated.

Through the combination of these two academic paths, I have built a unique skill set that blends financial expertise with healthcare management knowledge. I believe this background is ideally suited to the goals of the ManagiDiTH, which bridges the gap between management, digital innovation, and the health sector.

Furthermore, I am excited about the opportunity to collaborate with a diverse group of students and faculty from various disciplines and countries. I am confident that the interdisciplinary and international character of this program will broaden my perspectives and enhance my ability to contribute to cross-functional teams and innovative projects.

The programme's flexibility in allowing students to combine academic learning with professional development is also particularly important to me, as I aim to apply what I learn directly to real challenges in the field.

In conclusion, I am enthusiastic about the opportunity to join the ManagiDiTH. I am confident that my academic background and the practical skills I have acquired through my studies make me a strong candidate for this unique learning journey. I look forward to growing within a vibrant academic community and contributing to the ongoing transformation of healthcare through digital innovation.

Thank you for considering my application. I would be happy to further discuss how my academic training aligns with the mission and objectives of the ManagiDiTH.

Sincerely,

**Achillefs Diamantis**
