

Motivation letter

I am writing to express my strong interest in the MSc Managing Digital Transformation in Healthcare program. With a BSc in Health Information Management with a gpa of 3.4/4.0 and five years of experience in the field, I am confident that this program will equip me with the knowledge and skills necessary to drive meaningful change in the healthcare sector.

Throughout my academic and professional journey, I have developed a solid foundation in health information management, including courses in Python, database management, Java, public health, electronic health records, and medical records management. These skills have prepared me well for this MSc program, and I am excited to build upon them.

My research experience on nurses' resistance to using Electronic Health Records (EHRs) at the University of Cape Coast Hospital has given me valuable insights into the challenges of implementing digital health solutions. Despite the aim of reducing patient waiting times, our study revealed underlying issues such as computer illiteracy, lack of nurse involvement, and poor user interface design. This experience has deepened my understanding of the complexities of digital health and motivated me to pursue further education in this field.

My primary motivation for pursuing this MSc program is to gain more knowledge in the digital health field, which I believe will enable me to contribute to reducing mortality rates in Ghana. I am particularly interested in telemedicine, which could help bridge the gap in healthcare access, especially in rural areas with poor road networks. By gaining expertise in digital transformation, I aim to support sustainable development in Ghana and Africa.

My career goal is to become a leader in digital health such as health informatics researcher, where I will contribute to research in health informatic and leverage technology to improve healthcare delivery and outcomes. I believe that the MSc Managing Digital Transformation in Healthcare program will provide me with the ideal platform to achieve my goals, and I am excited about the opportunity to learn

from experienced faculty and collaborate with like-minded peers.

I am confident that my unique blend of academic background, professional experience, and research expertise makes me an ideal candidate for this program. I look forward to the opportunity to contribute to and learn from the academic community.

Thank you for considering my application.

Sincerely,

Patrick Korankye.
