Admissions Committee

Master's Program in Managing Digital Transformation in the Health Sector

Dear Members of the Admissions Committee,

I am writing to express my strong interest in joining the Master's program in Managing Digital Transformation in the Health Sector (ManagiDiTH). As a dedicated Radiographer with four years of experience and a Bachelor's degree in Medical Imaging and Radiotherapy from the *Escola Superior de Tecnologia da Saúde de Coimbra*, I am excited to contribute to and benefit from this program's unique curriculum and opportunities.

Currently employed at Imagerie du Flon in Lausanne, Switzerland, I specialize in MRI and mammography examinations and have developed significant expertise in using advanced healthcare IT systems such as RIS/PACS and other programs like *RadOffice*, *XPLORE*, *Senoiris*. This exposure has sparked my passion for the integration of technology in healthcare, particularly in optimizing processes and improving patient outcomes. Pursuing this Master's program aligns perfectly with my aspiration to lead digital transformation projects in healthcare organizations.

Your program's focus on management and digital transformation resonates with my professional experiences and future goals. Over the past year, I have actively supported the implementation of digital workflows in radiology, providing user support and ensuring seamless communication between the IT and clinical teams, when our institute switched to *Xplore*. I am confident that the skills and knowledge I will gain through the ManagiDiTH program will enable me to take on leadership roles in driving healthcare innovation.

The program's online format is particularly interesting, as it allows me to balance my current professional commitments with academic advancement. My proven ability to manage responsibilities effectively, positions me to excel in this dynamic and demanding program.

Beyond my technical expertise, I bring a commitment to lifelong learning, as demonstrated by my participation in numerous congresses and seminars, including advanced mammography training and conferences on personalized cancer screening. These experiences have enriched my understanding of the evolving challenges in healthcare, further motivating me to pursue this Master's degree.

I am excited about the opportunity to collaborate with peers from diverse professional backgrounds and I believe we can explore innovative solutions to the pressing challenges

facing the healthcare industry today.

Thank you for considering my application. I would be honored to participate in ManagiDiTH program and I look forward to any further information you may require.

Best regards,
Diana Duarte Domingues
