

To Whom It May Concern

Almana Hospital is a tertiary care health facility in the Khobar city of eastern province, Saudi Arabia. It is a 250-bed hospital with state-of-the-art surgical and medical facilities in a variety of subspecialties supported by modern equipment. The hospital is affiliated with undergraduate teaching institutes, where modern education is provided.

Dr. Imran Khan worked in Almana Hospital as senior registrar of cardiac surgery from 23 August 2016 to 13 July 2021. He was then promoted to the role of consultant cardiac surgeon on 14 July 2021. He is currently working as a consultant of adult cardiac surgery (14 July 2021 till date).

His role involves providing care to patients who need open heart surgery. This includes preoperative assessment, surgeries in the operating room, and postoperative care. Moreover, he participates in quality improvement activities and is involved in teaching residents, registrars, and undergraduate students.

He has more than 32 publications in various national and international journals and has also presented his research at various international meetings, such as the Asian Society of Cardiovascular and Thoracic Surgeons' meeting in Taiwan and the Saudi Heart Association meeting in Riyadh, Saudi Arabia. He also organized various cardiac surgical conferences and symposiums.

He believes in continuous learning and self-improvement and has proved to be a valuable member of the cardiac surgical team.

I wish him the best of luck, and I would be glad to provide any further information.
