

Profile will be available until 15 October 2024

For years, I've dedicated myself to nursing within various hospitals, focusing on nephrological care. However, my recent journey has led me to embrace digital healthcare solutions and delve into clinical research. With an insatiable curiosity for the future, I'm deeply intrigued by emerging technologies and innovative approaches to nursing practice. Balancing the roles of a dedicated mother to three children in Espoo while working in Helsinki fuels my passion for making a meaningful impact in healthcare.

## COMMUNICATION AND INTERPERSONAL SKILLS

### Experience as a home dialysis nurse

My work as a home dialysis nurse consisted:

- educating patients to do demanding peritoneal dialysis at home (also in english)
- educating nurses to do demanding peritoneal dialysis at patients home or in a hospital environment
- class room lectures for new patients about home dialysis in general
- class room lectures for new dialysis nurses about peritoneal dialysis
- planning for remote digital care pathways for home dialysis patients
- lectures in a national level about digital pathways for home dialysis patients

## MANAGEMENT AND LEADERSHIP SKILLS

### Research Nurse in BOC

My work as a research nurse in Better Health at Home (BOC) -consortium consists coordinating of five different study groups. Consortium includes Helsinki University Hospital (HUS), VTT Technical Research Centre of Finland (VTT), Aalto University the Department of Computed Science, Aalto University Department of Industrial Engineering and Management and University of Jyväskylä Faculty of Sport and Health Sciences. Working language in this group is english. My duties includes working as a secretary in consortium meetings, recruiting patients and health care professionals to all study groups and coordinate day to day duties between consortium members and in study in general.

Consortium studies consists the topics:

- Importance of home dialysis and more effective method for follow up
- Importance of wearable sensors
- importance of human-centered design in eHealth
- using theory- and evidence-based strategies to promote self-management behaviors in chronic kidney disease

- importance of value-based system design of dialysis in national level
