

Subject: Motivational Letter

Members of the panel for assessing applications,

Throughout my years at my master's degree in Business Intelligence at ISCTE-IUL, I found a new passion about Data and Artificial Intelligence. With this new passion, I did my thesis focusing on using AI in medical care, and this research work got me thinking on why don't I get another master's, but now focusing more on medical care so I can understand better on how to use AI and Data to optimize healthcare. So, by saying this I'm applying to this master's programme so I can continue my passion.

Thanks,
