TO WHOM IT MAY CONCERN

Dear Sir/Madam,

RECOMMENDATION

RE: MRS APPIAH-DWOMOH EDEM (Nee MS BANSAH)

1. I am Col MM ibn-Abubakar, Chief Physiotherapist and Head of Physiotherapy Department at the 37 Military Hospital, Accra. I have known Ms Edem Korkor Bansah since her university years when I was Clinical Instructor for her class. I was later to supervise her internship and again when she became a junior colleague, upon employment into my department as Physiotherapist in Dec 2007-2009. Having known her this much I couldn't resist the request to referee her.
2. This is a calm personality with a very pleasant disposition; as physiotherapist, Edem could be credited for applying high level of diligence and commitment to ensuring successful accomplishment of her assigned responsibilities. She has a patient centered attitude and had exhibited excellent command over her responsibilities and duties in same capacity. Her efficiency in carrying out patient assessment and deciding on appropriate out-patient and in-patient therapeutic interventions had been remarkable.
3. With so much initiative, she had always been able to rise above challenges and effectively accomplished outstanding routine duties. Edem had also effectively participated in the supervision of PTAs. She had in collaboration with another colleague mooted the idea and subsequent creation of a separate pediatric physiotherapy section in the department which has over the years, provided quality physiotherapy services for this category of clients. These undoubtedly have been of immense assistance in the general department administration as well as in the professional management of junior colleagues.

4. Mrs. Appiah-Dwomoh simply exudes professional enthusiasm in carrying out her duties inducing in the process, all those with whom she works, with equal zeal and morale. Her sense of judgment and selfless devotion to duty is exemplary.

5. I strongly recommend her to any Health Institution that may want to hire her professional service. She has expressed so much desire to return to clinical practice and I have no doubt in her capacity to perform.

MM IBN-ABUBAKAR
